We first met Donna years ago when we took our dogs to the same vet clinic she went to. Although we were childless at the time, we purchased one of her swim videos. We watched it and were fascinated by what we learned through viewing Donna's program.

Several years later, after we had put in a pool and then experienced the birth of our first child, Jenna, we thought of Donna again. We asked her to come over for a trial lesson and were absolutely amazed by the results. After just one lesson Jenna, who was less than 1 at the time, could kick in the water and reach for the edge of the pool. In subsequent lessons Jenna really advanced beyond anything we ever expected.

Jenna is now 2 ½ and has just started her third season of lessons and we couldn't be more thrilled. Donna is also instructing our 13 month old son, Anthony. Donna has also given lessons to some of our friends at our pool.

Donna seems to instantly put children at ease in the water and gains their confidence (and ours) immediately. Her teaching style is very goal oriented and stresses safety, which anyone would learn if they purchased her video. Her video is a very important tool for every family to have in their home.

We are so pleased with the results we have realized with our daughter's progress and we look forward to the progress that we know our son will make with Donna's teaching. We have been so impressed with Donna that we have and do recommend her to all our friends and anyone else who asks. Anyone who can not take a class from Donna should purchase a video.

Donna is truly wonderful and we can't say enough about how secure we feel knowing that, with the skills Jenna and Anthony have learned, our children are comfortable, happy, and SAFE in the water.

Thank you, Thank you, Thank you Donna!!

Sincerely,

Joe & Heather Hornick
